

LUMI'IN

A COMPANY FOR A BRIGHT FUTURE

Lum'in designs, assembles and delivers connected, autonomous and hybrid solar lighting systems. A pioneer company on the solar public street lighting market, Lum'in offers real alternatives to classic street lighting by supplying cleaner, cheaper-to-use and smarter lamp posts. A small revolution similar to the transition from classic phones to multitasking smartphones...

LUMI'IN AT THE PEAK OF TECHNOLOGY

- More than 10 years of experience and 4 000 lamp posts already installed
- 3 years of research and development thanks to our participation in the "Malijai eco-industrial park"

3 TIMES LABELLED

GreenTech Verte, label awarded to Lum'in by the Environment Ministry to help us develop numerical innovations in service of the environment.

CEDRE, label awarded to Lum'in by the Région Provence-Alpes-Côte d'Azur for its engagement regarding RSE (Company's Social Responsibility).

FLEXGRID, label awarded by the Capenergie pole to federate societies capable to put in action the industrialisation program "Réseaux Electrique Intelligents (Smart Grid)", of which Lum'in is a member. Lum'in, alongside big groups like EDF and local communities, brings one of the most structuring project of this dynamic with Flexlight. With Flexlight, the PACA region seeks to become the French full-scale demonstrator of these new technologies around the world.

WHY CHOOSE A LUMI'IN LAMP POST

AN INNOVATIVE AND EFFICIENT PRODUCT

- A lamp post with adjustable and programmable light intensity
- A LED lighting that is less energy consumptive and more adapted than traditional filament lamps

EASY AND QUICK TO INSTALL THEM ANYWHERE

- No need for power connections
- You are free to install them wherever you deem fit
- Ideal for isolated zones and countries that don't have a connection to the electricity grid

GUARANTEED QUALITY

- Our components manufactured mostly in France and Europe are a guarantee of the know-how used, as well as of the reliability and durability of our lamp posts
- Work 366 days per year, independently of any electric grid

A LARGE PANEL OF STYLISH, CLASSIC AND CONTEMPORARY DESIGNS

- Options available : camera, motion detector, choice of colour, anti-corrosion paint

A LOW ENVIRONMENTAL FOOTPRINT

- Lumi'in lamp posts respect the environment: they do not need any trenches to be dug
- Fully autonomous and clean : no CO2 emissions

YOU INVEST, YOU SAVE MONEY !

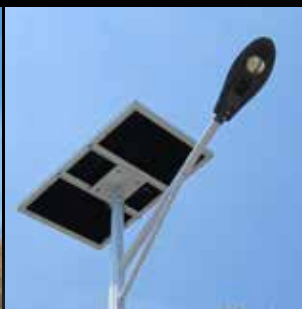

- A quick profitability : money saving during investment and during the lamp post use
- Since this market is encouraged by the state, you may benefit from different subventions
- Better quality/price ratio than the classic public lighting suppliers
- Also prevents cable thefts and limits illegal connections to the grid
